Re: Rich Hill Road

---

Dear Megan:

I am writing to let you know that I do not share incorrect information with my constituents. I get my information from local, public trusted sources. These sources include elected officials, including those from County Council, who write me both letters and emails answering questions that either myself or my constituency might have. I merely act as a conduit to my constituents and do provide answers to our group very quickly. I believe Mr. Niggel waited 6 months to hear from your office.

You are correct on the AIM loan. Harmar Township will not apply for the AIM loan as they have no interest in their responsibilities, namely fixing their portion of Rich Hill Road; unless they are given the money to do so! Simply put, Harmar could care less about Rich Hill Road. This is not new information. Our portion of the road is in very good condition. Their portion has been in shambles for over 25 years. This is the main reason we are begging for Dan's help with this very serious road crisis. However, both the County and Harmar continue to make excuses. Why does the County pave roads in parks that no one goes to anymore? Why does the County waste money on outlandish parties and events that no one really cares about? Why not be responsible, do the right thing and save a life in the process? Please just ask Dan to pay us a visit as I am happy to give him a tour of the road. Our goal – have the County help repave the road for Harmar Township and show them what true leadership is! Then perhaps we can all move on from this disgraceful situation.

Wouldn't a County gift to Harmar fall under infrastructure improvements? Or community programs? Or road improvement projects?? I am certain Dan can make this happen. Again, please ask him to do the right thing and help us before someone dies on this road. After all, what do we pay taxes for? I do believe this is exactly when we mean when we say that both the County and Harmar Township are passing the buck of responsibility.

Lastly, I never placed blame on you for the call to my employer last year; however a deviant individual stating that he was from Dan's office tried to have me fired from my job; or a minimum get me into trouble. The attempt failed to say the least. And why would someone conduct such wrongful and hurtful behavior? For trying to get a road fixed! Again, I did not accuse you of making the call, but the fact is that someone from Dan's office ordered the call to be made and someone made the call. It happened and I have witnesses that know so. While I did not accuse you at any time of placing the call, however I do suspect that you played a role as all of my communications with Dan's office begin with you. I believe my representation of the facts on this is both fair and justified to say the least. It is funny, but once our Solicitor began asking questions and sending letters to Dan's office, we never received another call.

Please do the right thing and help us!
