

Lorena Prato sent to Darrin Krally on 9/10/11 with cc to the group listed below. A response was sent to Lorena asking her to call and address her concerns with me.

To those that responded under separate cover, thank you for your continued support. I will continue to serve as I have for the last 5 years via a consistent open door policy. Thanks. Darrin

Hi Darrin:

I am extremely disappointed with the way the Township had address, or not address on this case, matters that should be a priority for everyone who lives in Indiana Twp. We are feeling left out and truly forgotten on this end of the township. Since you are our supervisor, and may want to continue to be our supervisor, I am asking you to stand up for us, **your district**. We are not a dumping ground for things that the board don't want on their end of the township (gas wells and their toxic, unpleasant smells; fly ash dump from the power plant in Springdale, etc.).

I know that people has the government they deserve, so I am asking you to show me (and the residents of Rural Ridge), that we make a good choice.

Sincerely,

Lorena Prato

Once again I followed directives given to me and you and the board have thwarted my sincere efforts. I will pass this information along to all parties. I will come and speak during citizen's forum regarding bringing Prof Stoltz in the future I am sure if you had wanted to call PProf Stoltz you could have checked the number with Dr Mours(?) I dtill think given the truth that I contacted Carolyn weks ago and followed her guidelines until she realized you must make the decision and move us to a 25 min slot that you should have the courtesy to phone Prof Stoltz. HI number I just checked at the university is 412 396 6333. I think I had mistaken the 3 for a 5 but here is it. I would like to keep a reputation of Indiana townships supervisors professionals. 412 396 6333

Please psread the word that Dan Taylor had decided not to let Prof Stoltz speak at his meeting though itts relevance to zoning issues is paramount. They do not want to a longer meeting as he stated to me earlier. I will schedule Prof Stoltz when t he board deems allowable and in the meantime will arrange some public hearing with this director of Environmental Sutudies at Duquesne University very soon, tell your people I am disappointed as they must be.  
Cora

Dear Ms. Hopkins,

I will not allow Professor Stoltz to address the Board at the Sep. 13 meeting. As you requested, I tried to contact him at the phone number you provided, but the voicemail greeting indicated the mailbox belonged to someone else, so I did not leave a message. Please contact him and let him know of my decision to postpone his presentation to a future meeting.

Citizen's Forum is designed for **short** comments on Township business or to make the Board aware of developing issues, Longer presentations are on the agenda as separate topics and must be approved by the Manager or Mayor in advance. That way, we can avoid conflicts with other controversial topics that will cause long wait times for attendees.

The Board will discuss when Professor Stoltz's topic can be scheduled and I would appreciate your presence to answer any questions they might have.

Sincerely,  
Dan Taylor

Dan Anderson - please add this topic under new business for discussion.
