

Harmar Supervisors,

April 21, 2008

I grew up in Indiana twp and now live off Rich Hill Rd. In my view, this road has always been an issue since I was a teenager visiting friends off of Rich Hill road and now that I live here I want something done about this horrific road. I see the battle between townships and it makes me sick. I see the Hamar board looking pretty pathetic (or at least three) after I read my local newsletters and board letters.

I would like to comment about some quotes on John Burns's article "Who uses Rich Hill Road". **Everyone and their families use it!!!** This is why it should be paved. My family lives here now and we see what and who travels this road. It is not only the families but the business' with their trailer trucks, the hundreds of cars daily out of PISA, the fishermen, the families & companies above Jacoby and now that route 28 is a mess...why not cut through Rich Hill road.... which will go on for months due to construction. How many cars will that total and how many years had this happened in the past? How do these people know about Rich Hill road? Because they live in Hamar twp and surrounding communities excluding Indiana Twp and know the shortcuts!! Another thing, if you want to shut down the road, then maybe we should stop shopping and spending money in your town. Crazy talk isn't it? Think about how much money is spent in your area from Indiana twp residents. You should really consider putting that toll booth in so we can keep the people out who use your Rich Hill road to Jacoby and don't even go thru Indiana Twp.....WOW, 99.9% of Harmer residents and business owners would love that!!

Thank you for your time,

A resident of Indiana Twp
