### Fix Rich Hill Road

Indiana Township owns three miles of Rich Hill Road and Harmar Township owns one mile. The Indiana section was paved three years ago and is in good condition. Harmar Township's section was paved about 20 years ago and that portion is treacherous. It is riddled with large and small potholes, large rocks and loose gravel, broken logs along the roadside and very hard-to-see yellow lines. Bottom line: Its portion of the road is an accident waiting to happen!

I spoke at the Harmar Township supervisors meeting in February and asked them to approve a complete paving of Harmar's portion in either 2008 or 2009. Unfortunately, my request was not taken seriously. Indiana Township is glad to offer both guidance and support, but it is not our responsibility. Harmar has an immediate obligation to fix this death trap!

I have several hundred constituents behind me. They are ready to do whatever is necessary to achieve this goal in 2008. I am asking for all readers' help.

Please join us by asking the Harmar supervisors to fix the road. Simply visit [darrinjkrally.com](http://darrinjkrally.com) and click on the "Fix Rich Hill Road" link and you will be able to join your fellow motorists who want a solution ASAP. Your signature counts. Every signature counts. Let's make it happen together!

As County Councilman Nick Futules stated, Harmar Township has a liability issue at hand and agreed that Harmar must find the money to make these repairs ASAP. Our goal is to make this happen before a serious injury or an unnecessary death occurs due to the deplorable conditions. We need to take corrective action immediately.
